

# STERI-C15

## KEEP YOUR EMPLOYEES AND YOUR WORK ENVIRONMENT SAFE

- Eradicate Viruses and Bacteria
- Reduce Potential Human Exposure to Disease
- Wipe, Spray, and Dip Applications are Effective

Appearance.....	Clear Liquid
pH at 10% Dilution.....	11.0
Density (lbs per gal).....	8.87
Dilution.....	Straight or 50/50

Steri-C15 has been specifically formulated to eliminate viruses and bacteria in medical and industrial environments. If an environment has heavy human traffic and potential for viral or bacterial contamination, Steri-C15 can be sprayed or wiped on the surfaces to eradicate the contagious material.

It is recommended that Steri-C15 is used directly out of the container in its neat form to be most effective. If needed, Steri-C15 can be used at a 50/50 diluted ratio mixed with water. In an application where the user applies Steri-C15 with a rag, it is strongly recommended the user wears gloves.
